1. Imperial County Behavioral Health Services (ICBHS) – California Opioid Settlement Funds in Imperial County.

Gabriella Jimenez, Assistant Director of ICBHS and Victoria Mansfield, Deputy Director of ICBHS, provided an update on the California Opioid Settlement Funds project in Imperial County. During the opioid epidemic, state, local, and tribal governments have brought several lawsuits against pharmaceutical and drug distribution companies that have fueled the crisis. California has joined several lawsuits against the manufacturers, distributors, and other entities such as Walmart, CVS, Walgreens, Janssen Pharmaceuticals, McKesson, AmerisourceBergan, and Cardinal Health, among others, that are responsible for aiding the opioid epidemic.

In late 2022, participating subdivisions in California received the first round of funding from settlements to be used for future opioid abatement activities. All funds received from the California abatements account must be used for future opioid remediation. For the purposes of this funding, opioid remediation is defined as the care, treatment, and other programs and expenditures designed to: address the misuse and abuse of opioid products; treat or mitigate opioid use or related disorders; or mitigate other alleged effects of, including on those injured as a result of the opioid epidemic.

Imperial County will receive opioid settlement funds with ICBHS managing these funds and will ensure that treatment and remediation activities are implemented. ICBHS will focus on implementing High Impact Abatement Activities (HIAA) to reduce, lessen, or end the opioid crisis by providing care, treatment, outreach and other activities. To determine how to best address the needs of the Imperial County, they shared a survey with attendees to obtain feedback. This survey will also be shared amongst other groups. Based on the data received, ICBHS will develop an implementation plan that will outline the HIAA that will be prioritized and the remediation strategies.
